# PREFATORY.

COMMERCIAL conditions in the South to-day show a phenomenal growth in production and manufacture. The industries have become strong and resourceful. Whereas a few years ago the raw material was shipped elsewhere for manufacture, to-day the finished product is turned out at home. Most noteworthy is the great increase in the manufacture of cotton goods in Georgia and the iron industry of Alabama. The inexhaustible natural resources, the coal, iron ore, the pine lumber, have caught the eye of the financier and promoter and great enterprises have come into being and cities built as it were in a day.

The South may look to the home seeker for a great increase in population during the next few years. Irrigated lands in the West and Northwest can now be secured only at prices in excess of the cost of homes in the South, with the advantages of soil, climate, cost of living, accessibility to markets and social conditions all weighing in favor of the Southern selection. The fertile soil of Iowa, the coal of Pennsylvania, the marble and granite of Vermont and New Hampshire and the pine forests of the North, the grazing lands of Wyoming, the dairy interests of Wisconsin and the natural resources whose development has brought wealth and a prosperous people to the West and Northwest can be better than duplicated in the South where an Empire is waiting development.

The Secretary of Agriculture after a recent tour of the South declared that no section of the world offered such inducements for diversified farming and predicted that the South would experience a development during the next few years greater than had ever taken place in any section of the country. Conditions are conspiring for a fulfillment of that prophecy. United, energetic and aggressive action on the part of the Southern people are hastening it. An example of this enthusiasm is shown in the "Greater Georgia" movement which has gathered a wonderful impetus in the last few months. It is an effort to advertise to those of other states seeking homes in a genial climate and a productive soil the benefit of this section and to bring manufacturers to realize the splendid facilities offered.

In the compilation of the Georgia-Alabama-Florida Business Directory great care has been devoted to accuracy. The canvass for each state has been expeditiously accomplished and the information is complete, up-to-date and readily accessible. The directory contains a complete list of all merchants, manufacturers, ship-pers and professional men, together with full description of each town and city as to location, population, industries, railroads, banking facilities, etc.

We thank our public spirited patrons for their generous support on this work.

Respectfully,

P. R. JOHNSON, Manager.

## PROOF OF OUR CLAIMS.

Woodlawn, Ala., Aug. 6, 1902.

To Whom It May Concern:

This is to certify that I have sold a house and two lots to Miss Mary A. McMeans, of Avondale, Ala., to be paid for by the National Home Builders of Birmingham, Ala.

I am personally acquainted with those managing the work, and believe they will handle any business entrusted to them, according to their agreement. Yours truly,

R. P. YANCY,

Treasurer of Woodlawn, Ala.

---

Birmingham, Ala., September 3, 1902.

National Home Builders:

Gentlemen: I have been living in Birmingham and suburbs for seven or eight years (of course renting all the time), the rents growing higher each year, till I thought I would have to leave the State. But I took a contract in your company, and am now in my own home, paying less for it than I have been paying for rent, and am my own landlord. I am perfectly delighted! This company is certainly the best institution of its kind for the working man ever organized in Birmingham. I have every confidence in the company and its management. This is given unsolicited.

G. W. RUSSELL,

Foreman Advertising Department, Daily Ledger.

---

To Whom It May Concern:

This is to certify that I have bought two lots and a house in Woodlawn, Ala., through the NATIONAL HOME BUILDERS, and my payments under contract are \$6.70 per month, and I am collecting \$10.00 per month rent for the house, which leaves me a clear profit of \$3.30 per month after paying for the home. I also wish to state that the management of the company have treated me as well as I could ask, and believe they will carry out their agreement with all who take contracts with them. MARY A. McMEANS,

Avondale, Ala.

---

To Whom It May Concern:

This is to certify that we had fallen victims to the Building and Loan company, and as usual were paying the high rate of interest charged by such concerns, and after making a thorough examination of the plan offered by the NATIONAL HOME BUILDERS, took a contract with them, and through them have been enabled to get a release from the Building and Loan, and are paying it off through the NATIONAL HOME BUILDERS in payments of \$7.00 per month, the expense of carrying it being only 75 cents per month, which we think beats sixteen per cent. Our experience with them has been satisfactory, and we would advise every one wanting a home to take advantage of their liberal plan.

JOHN R. CARAU AND WIFE,

R. F. D. No. 1, Birmingham, Ala.

# PATENTS

**WILLIAM S. HODGES, ATTORNEY AT LAW,**  
 Atlantic Building, Washington, D. C.  
 Applications for Patents, Designs, Trade Marks etc. prosecuted at reasonable charges, commensurate with  
**Efficient service.**

The above picture represents my sixteen plate static machine and twenty inch coil for X-Ray and Electro-Therapeutic work.

This picture shows a patient taking the x-ray treatment for a cancer of the breast, using the twenty inch coil to generate the rays and using the static machine, giving a positive head breeze for nervous headache. The X-Ray treatment is now recognized as a cure for Cancer, Lupus, Tuberculosis of joints, Hodgkin's disease or Pseudoleucaemia, Eczema, Acne, Psoriasis and many other chronic skin diseases.

Static Electricity is used in treating nervous diseases, blood troubles Rheumatism, neuralgias and to build up the strength after long spells of sickness or wasting diseases. I use also the violet ray imported from Europe, the same as used in the famous violet ray hospital of Copenhagen, Denmark, operated by Dr. Finsen. This is used to cure lupus, eczema, acne, epitheliomas, and to heal over the surfaces after using the X-ray and to take out pain in acute inflammations where there is swelling.

I use galvanic electricity in the treatment of female diseases and can frequently cure troubles effecting the ovaries, falopian tubes and uterus without an operation. I solicit all cases requiring electrical treatment either by the galvanic, faradic, sinusoidal or high frequency electric currents. My work, is general office work, including eye, ear, nose and throat diseases, that I have made a specialty of for many years.

Any one wishing information on the treatment of diseases that can be treated in the office, write me at 157 Dauphin Street, Mobile, Ala. T. Aubrey Dickson, M. D.

## MOBILE

County seat of Mobile County and metropolis of southern Alabama. At the mouth of the Mobile river on Mobile Bay, 25 miles from the Gulf of Mexico. Population 40,000. Railroads: L & N; Mobile and Bay Shore; M & O; Southern; Mobile, Jackson and Kansas City. Business interests principally cotton and lumber industries. This is a very extensive cotton market, an average of about 275,000 bales per annum being shipped by rail and steamers. Oysters, timber and lumber are also shipped in large quantities. There is a large naval trade here and a growing export trade in coal and iron. The agricultural products are cotton and vegetables of every variety. It is a port of entry.

## PENSACOLA

County seat of Escambia County. On Pensacola Bay, ten miles from Gulf of Mexico. Pop. 20,000. Railroads: L & N; Pensacola, Ala. & Tenn. Business interests are varied; it is the metropolis of Western Florida; a port of entry with excellent harbor. Has a large export trade in cotton, grains, phosphate, coal, iron and tobacco. The manufactured products are lumber and fertilizers. Has extensive sheries and large trade in naval stores. Here is a United States Navy Yard, Fort Pickens and other military posts.

### TAMPA, County Seat of Hillsborough Co.

On Hillsborough Bay, an arm of Tampa Bay, 30 miles from Gulf of Mexico; pop. 15,839; railroads: Atlantic Coast Line, Seaboard Air Line. Has good harbor. The port of Tampa is nine miles distant; there is extensive commerce between this point and Havana, Cuba; Key West, Fla.; Mobile, Ala., and Central America. Here is a large number of cigar factories; the fruit and fishing industry is also important, and phosphate is mined in the vicinity.
